

# Two-Step Sizing Guide for Chilly Dog Vest

## Step 1: Measure Vest for Fit

The Chilly Dog Vest is available as an adjustable, one-size-fits-all garment. Puppies and small dogs under 20 lbs may not be suitable for the added weight of a cooling vest. Extenders are available for larger dogs that go beyond the standard size!

Check out the instructions below for measurements, as well as the diagram for reference:

1. Vest Length: 9"
  - Minimum distance between front and back legs, to allow room for relief
    - Females: 11"
    - Males: 12"
2. Rear Strap: Adjusts from 20-28" (+6" with extenders)
3. Middle Strap: Adjusts from 20-32" (+6" with extenders)
  - This distance around the body should be the largest part of the dog's chest.
4. Front Strap/Yoke: Adjustable as needed
